**Cognitive Science****Note**

The credits taken into account when calculating academic success are those dictated by the evaluation modalities for each teaching, which are established by the study plans and further detailed in the courses' descriptions. Should an online examination session be planned by the rectorate, the modalities established by the study plans for each teaching are to take place as follows :

- written exams are taken as online written exams, usually with the same allotted time;
- oral exams are taken as online oral exams, usually with the same allotted time.

When the evaluation modality is set outside of the examination session timeframe (graded or non-graded continuous assessment), the same modality is applied even in case of an online session. When necessary, the modality of an evaluation will be adapted to the circumstances according to the professor's indications detailed in the course's description at the beginning of the semester.
