

## INTERNSHIP OFFER – TECHNOLOGY ANALYST

The [Joint European Disruptive Initiative](#) (JEDI), the major European initiative for disruptive innovation, is offering a **Technology Analyst** internship position.

### The mission

Research & draft briefings on emerging technologies, on innovation policies, on major and upcoming technology players. Follow and engage with technology events and major thought leaders. Support JEDI thought leadership reports and workshops, as well as the organisation of JEDI Technology GrandChallenges.

### What we are looking for

- Very strong interest in technology
- Very strong analytical & synthesis skills
- Fluent in English (French/German/Italian/Spanish or other European languages would be a plus)
- Preferred academic profile: engineering or international relations/geopolitics
- Highly autonomous, responsible, dynamic. Digital literate (social media skills would be a plus)
- Female candidates are encouraged

### Logistical aspects

- Starting date: regular intakes
- Ideally 6 months
- Legal compensation
- Location: Flexible at European level

**Please send your CV and an email to [jobs@jedi.foundation](mailto:jobs@jedi.foundation) explaining why you are the right person for this exciting mission.**

### About JEDI

The Joint European Disruptive Initiative (JEDI) seeks to bring Europe in a leadership position in breakthrough technologies by launching Tech GrandChallenges to push the frontiers of innovation, with a radical method based on excellence, no geographical return, speed, very high expectations & bold risk-taking. Driven by humanistic values, a purpose-driven approach to solve major societal issues in environment, healthcare, digital, education, oceans & space through innovation, JEDI is a not-for-profit financed by foundations, government, corporates and powered by the contribution of 4.600 technology and scientific leaders from academia, corporations and deeptech startups in 29 countries in Europe.
